

SPOT WATER DETECTION SENSOR

Detect water in small areas

This water detection sensor can be used with all Sensaphone models to detect the presence of water on a horizontal surface. It is powered by internal batteries which last for 3 to 5 years. When the batteries start to run down, the sensor will automatically cause an alarm when no water is present. Multiple sensors can be wired in series to a single input.

TECH SPECS

Name	Spot Water Detection Sensor
Connection	Hardwired
Housing	Black Plastic
Dimensions	2.2 x 1.3 x 3.6" 57 x 28 x 92mm
Sensor Series	Contact Series
Battery Life	3 to 5 years

All specifications subject to change without notice
