

Spot Type Liquid Leakage Detector

Description

The Sensaphone FGD-L8216 Spot Type Liquid Leakage Detector is used to detect the presence of liquid on a horizontal surface. Multiple detectors can be connected in series.

Package Contents

- (1) Spot Type Liquid Leakage Detector

Specifications

Dimensions:
57 x 47 x 39mm
(without the sensing probes)

Weight:
50g

Housing:
Grey plastic

Sensing Probes:

- Package comes with a pair of "L" shape conductive electrode probes which can be setup into two different detection height levels by different orientation.
- Can be replaced with most of the water sensing cables in the market.

Compatibility:
8500, WEB8000

*Specifications subject to change without notice

Spot Type Liquid Leakage Detector

Equivalent to 5m Cable Length.....FGD-L8216-5

Equivalent to 10m Cable Length.....FGD-L8216-10
